## DETAILED ACTION

### *Election/Restrictions*

1. Claims 11-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 9, 2004. The embodiment shown in Figs. 39-42 does not include an arm with a hollow tubular portion. Claim 1 has been canceled.

### *Drawings*

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fishing rod, and the upper wide open mouth must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 3643

of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. The disclosure is objected to because of the following informalities: on page 1, patent number 6,347,532 is incorrect. It appears that the correct number is 6,374,532.

Appropriate correction is required.

### ***Claim Objections***

4. Claim 10 is objected to because of the following informalities: in line 6, "the axis" is incorrect. —An axis—would be correct. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 9 is confusing since it is not clear how a plurality of arms extend from the pivot for suspending the bracket since the pivot and arm are suspended from the bracket. Is there more than one pivot. If so they should be

Art Unit: 3643

separately named. Claim 10 is confusing since now a fishing rod is recited, but no fishing rod is shown in the drawings or referred to in the specification. The only element that could be taken as a fishing rod is arm 714, but by no stretch can this be called a fishing rod in the normal sense of the word. Also, it is not clear how the lock defines a holder for supporting the arm and a fishing reel.

7. Claim 10 recites the limitation "the pivot" in line 5. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 10 and 5, as can be understood are rejected under 35 U.S.C. 102(b) as being anticipated by Williams.

The patent to Williams shows a fishing apparatus for supporting a fishing rod and reel as shown in Fig. 1. Williams shows a receptacle 14 having sidewalls and an upper open wide mouth 54. Williams shows a support member 78, 80 on the side wall of the receptacle in Fig. 5. Williams shows a bracket 84 in Fig. 5 that is removably mounted on the support member. Williams shows an arm 20, 22 pivotally connected to the bracket by slot 86. Williams shows a releasable lock 82 as part of the pivot for releasably supporting the arm in any plurality of positions. The lock defines a holder 36,

Art Unit: 3643

36, 38 for supporting the arm and a fishing reel or other sporting article mounted thereon to hold the sporting article at a selected angle of inclination.

***Allowable Subject Matter***

10. Claims 2-4, 6-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Craig, Ratza, O'Connor, Fleener, Zingrone, Luukonen, Fast, McEwen, Ward, James, Garcia, Morin, Prine, Hrdlicka, Hermanson, Smetlizer, Butler, Gates, Burns, Hoffman, and Zdankowski show other holders.
